

Industrial Cleaning Chemicals:

VIKING BATTLE HAMMER -134

Product description:

Our most popular Fleet and general cleaner.

Battle Hammer 134 is a superb, versatile bio-degradable liquid cleaner formulated for cleaning trucks, electric motors, construction equipment, cars, pick up trucks, bus washing farm implements and tractors.

With a unique mixture of synthetic detergents, solvents, sequestrants, corrosion inhibitors and wetting agents, it makes short work of equipment cleaning jobs.

Instructions:

Clean equipment and trucks using Battle Hammer 134 straight through your hot pressure washer.

Add from one pint to one quart of Bad Axe 534 to a 5 gallon bucket of water for a dynamite brush wash solution.

For general cleaning add 5-10 ounces of Battle Hammer 134 for every one gallon of water depending on soil load.

Mix Battle Hammer 134 10:1 with water, spray on surface from bottom up, let stand for 2 minutes and remove with hot high pressure from top to bottom.

Or..... use straight through the high pressure washer as an outstanding equipment cleaner. Mix ratio is determined by how wide open the chemical metering valve on your machine is opened. Most down-stream low pressure injectors are set at 20:1.

Presoak equipment with Bad Axe 534, let it dwell for about 2 minutes then wash with Battle Hammer 134 for a non-acid, two chemical wash system. You will be amazed at how well this works.

Customer benefits:

Battle Hammer 134 is biodegradable, has high rinse-ability, versatile, safe on aluminum and all ferrous metals, pleasant odor, moderate foam, guaranteed not to pillage or burn.
