New Heavy Duty Twister Vac

The Twister Vac is a rotary surface cleaner with wash water recovery capabilities. The new ANTV5 Twister Vac cleans a larger path than many other recovery surface cleaner accessories. Connect to a hot or cold pressure washer and a vacuum source to wash and recover the wash water in one step. Efficiently clean without splashing dirty water on clean areas/windows and eliminate the hassle of having to do a final rinse.

Features...

- New vacuum ring design doubles the length of vacuum hose. Unique geometric shaped deck with a brush skirt reduces drag and keeps the deck from “sucking” to the ground.
- Large 24.5” cleaning/vacuum path to clean 20,000 sq. ft. per hour
- Pressure ratings up to 4000psi @ 5.5gpm – includes qty 2) #2.7 nozzles, other nozzle sizes available for different pressures and flows, up to 6gpm
- Corrosion and rust resistant stainless construction is made to last
- Use hot water, up to 200°, for degreasing factory floors, drive-thru areas, garages, and more

Requires a 2” vacuum hose, power washer, and vacuum (minimum 104cfm/91” lift for 100’ of vacuum hose)

Options...

If you don't have an existing vacuum source – compatible Hydro Vacuum® recovery units start at just \$1295 list price.

To filter and recycle your wash water for reuse in the Twister Vac, use a Hydro Vacuum® ZVAC system, starting at \$3795 list price.
